

It's time to make nuclear arms control useful again

My own views on preventive measures:

- Boosting some collective efforts on nuclear arms control. **This is from CTBTO side**, which recommends reminding people about the dangers of nuclear weapons, the technological and human errors in the development and maintenance of nuclear weapons.
- Disarmament and non-proliferation. **We must respecting the right of legitimate self-defence of each country.**
- Deep understanding of the consequences made by nuclear guns. **In this way there must be transparency of social media/TV news** in each country to provide the real truth for the citizens about the real situation.
- **Some negotiations each year** with the involve all states, especially those in a possession of nuclear weapons.
- As soon as possible – the early **entry into force of the CTBT**, that bans all nuclear explosions.
- **Obligations set out in the Budapest Memorandum on Security Assurance.** The obligations must not be violated in any way, as Memorandum refers to three identical

political agreements signed at the OSCE conference in Budapest, Hungary to provide security assurances by its signatories.

- **Respecting** of sovereignty, independence, territorial integrity of each country around the globe.
- **Boosting international co-operation** between all countries in the nuclear field.
- **Importance of the Nuclear Security Summits**, that aimed at preventing nuclear terrorism around the globe. These kind of Summits must be taken each year.
- **We must support the international organization** such as OSCE, CTBTO, UN, etc., that plays a part in confidence and security building measures.
- **There must be promoted military transparency and baned military race between the countries.**
- **THERE MUST BE BOOSTED PEACE AND STABILITY BETWEEN THE COUNTRIES AROUND THE GLOBE.**
- **There should be more humanitarian and GOVERNMENTAL help** for countries with unresolved conflicts/wars, such as Ukraine, Syria, Israel&Palestine and so on. There must be shown and increased governmental transparency also to its citizens of each country.
- **International Documents: Vienna document, Helsinki final act and so on – each country should implement it in their own region.**

Humanity power to avoid such nuclear crisis

I strongly believe that pandemic Covid-19 is a nuclear catastrophe, which is a consequence left from unresolved conflicts/wars and what's most important peace instability between the countries around the globe. Everyone is trying to blame guilt each other, for example the most of countries says that China is guilty (as pandemic has started there), Russia says that guilty is US, US says that guilty is China and PSO (from the latest news) and so on I can write and write. Latest news from newspapers has showed that it's Iran's revenge to US for killing Iran's military commander G.Q.Soleimani. So, I believe that "virus" became latest battle between Iran, US amid tensions.

So, I can call Covid-19 as a Nuclear battle-2019/20, for which many innocent people die. I tried to draw a symbolic painting, which called "I'm a nuclear war, but in a slow motion and in a secret way." A gun symbolise nuclear arms control, a hand symbolise: warring parties, a gun directed to the Earth, of course, and on the gun – that secret nuclear battle, called Covid-19.
